

# Genesis Mediterranean Range of Swift Nest Boxes Order Form

Please fill in your details and put the quantity of each product that you wish to purchase in the "Quantity" column. The sub-total will be shown in the Sub-Total column and the final total will be shown at the bottom of the Sub-total column. Press the submit button and a copy of your order will be sent to Stephan de Beer who will then calculate the shipping cost and contact you with the details and an estimated delivery date.

The single entry swift nest box is designed for the use of one pair of swifts.

The double entry swift nest box is designed for the use of two pairs of swifts.

The triple entry swift nest box is designed for the use of three pairs of swifts.

The single entry anti-predator swift nest box is designed for use by one pair of swifts. The roof is sloped to discourage predators from using it as a platform to gain access.

The double entry anti-predator swift nest box is designed for use by two pairs of swifts. The roof is sloped to discourage predators from using it as a platform to gain access.

The triple entry anti-predator swift nest box is designed for use by three pair of swifts. The roof is sloped to discourage predators from using it as a platform to gain access.

Genesis' Own Sound System is specifically manufactured to play swift calls on a loop to attract swifts to the nest boxes and encourage them to use the nest boxes as their home. Everything you need is in the sound system package.

The Left Genesis Sound System Bracket is made from aluminium and is bolted onto the side of the nest box. This saves the hassle of drilling into block or brick. Make sure to order the correct bracket for your set-up.

The Right Genesis Sound System Bracket is made from aluminium and is bolted onto the side of the nest box. This saves the hassle of drilling into block or brick. Make sure to order the correct bracket for your set-up.
