

GENESIS NEST BOXES

Manufacturers of nest boxes for endangered

Customer Notice

Due to the fact that deliveries from China have virtually drawn to a halt, we have been forced to source an alternative amplifier for the Genesis Nest Box Swift Audio systems.

We are unsure if the delivery delays from China are long term or linked to the present lockdowns they are suffering, however, despite our very best efforts the goods are not forthcoming and delivery dates to us are continuously being extended.

To solve the problem, we have now started constructing the Genesis brand of amplifiers. This is considerably cheaper than the imported versions which attract additional costs and duties upon delivery to ourselves. The Chinese lockdown and Brexit form large parts in this problem.

The Genesis Own brand of audio system will only be supplied in one format, the deluxe model. The audio set is made up of an Amplifier, 8 meters of 1mm twin flex cable, a timer, USB stick, speaker in waterproof housing and a voltage reducing plug for the price of €121.77 including VAT.

We will still be hosting the traditional audio system with the Kentinger Amplifier from China, at its normal prices for both the basic and the deluxe model (the price of these models may increase should our cost increase due to availability of stock), the Genesis Own model will be in addition to the 2 imported models.

We thank you for your patience and understanding in this matter.
