

# Barn Owl Assembly Instructions

Parts list:

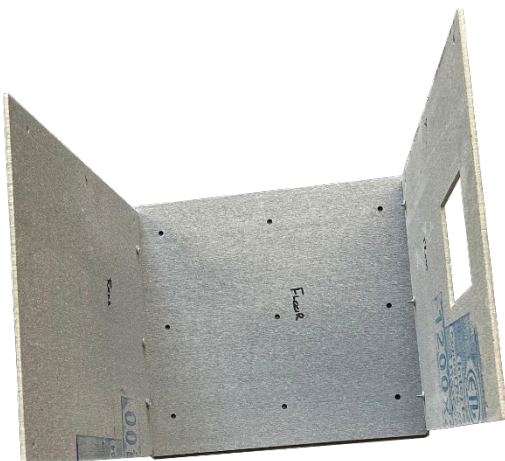

- 1 Floor panel
- 1 rear panel
- 1 front entrance
- 2 sides (left and right)
- Fledge tray
- Brackets

STEP 1: Place the floor panel on the work surface with the rough side facing upwards.

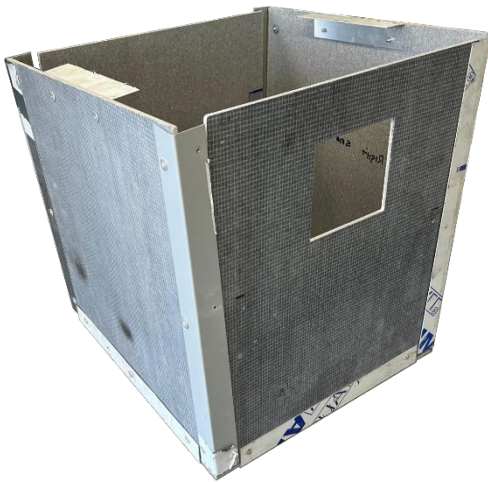

STEP 2: Put the rear panel in place and ensure that the aluminium bracket is beneath the floor panel

STEP 3: Put the front panel in place and ensure that the aluminium bracket is beneath the floor panel.

STEP 4: Insert one of the side panels by sliding the aluminium angle beneath the floor panel.

STEP 5: Place the second side panel in place with the aluminium angle beneath the floor panel.

STEP 6: Insert bolts provided into the front and rear panels through the pre-drilled holes. Place a washer on each bolt inside the box before fitting the nuts. A 7mm spanner is required to tighten the bolts.

**STEP 7:** Fix the two aluminium brackets to the front face of the nest box and put a bolt through each pre-drilled hole and use a washer and bolt to fix the brackets to the outside of the nest box.

**STEP 8:** Put the fledging tray onto the brackets with the framed side upwards. Place a bolt through each pre-drilled hole in the fledging tray panel and then tighten using the nuts provided.

**STEP 9:** Check all nuts to ensure that they are fully tightened and fix the roof onto the nest box using the bolts and 2 self-drilling Tec screws provided. Place the roof on the nest box with a large overhang at the front. Mark the position of the brackets and use the 2 Tec screws to hold it in place.

STEP 10: Your box should now be assembled. Please see our website for installation instructions. There are two ratchet straps included in the pack, use these to fasten the box in your chosen location ensuring that the nest box is held securely in place.
